## What it does?

### Our temperature screening solutions

- Record Peoples faces and what their temperature was no matter how many times they have gone past the camera
- Our system can also send alerts to mobile phones (Via Hik-Connect) or to your Desktop (Via Email) it will send you an image of the persons face and the temperature it was at when the image was taken, IVMS-4200 Desktop Software can also be used with this product
- Keep data for up to a month and have easy ways of extracting data

# About The Equipment

- The camera is accurate up to 0.5°C
- For applications where accuracy of up to 0.3°C a black box calibrator can be specified
- The camera will be mounted on a tripod for easy manoeuvrability
- The camera has both a day/night lens and a thermal lens meaning it can also be used for normal security
- The images from the day/night camera and thermal camera can be merged to create a high-quality thermal image (as seen at the top of the page)
